

W8

For lover of speciality Coffee

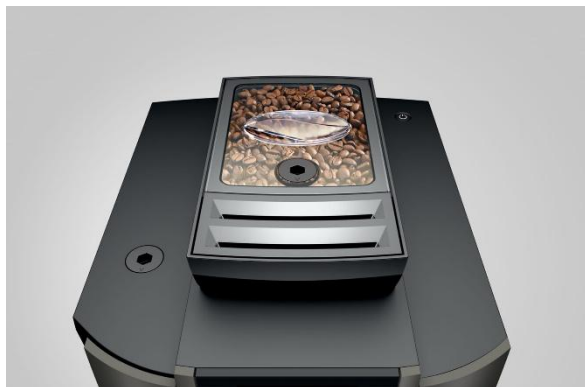

The compact, versatile choice

One of the best features of the compact W8 is its versatility: on its menu there are no less than 17 speciality coffees, all of which it prepares to perfection. Other components that contribute to its outstanding performance are the Professional Aroma Grinder (P.A.G.2) and fine foam technology.

In addition to its outstanding features, it is exceptionally easy to use: a clearly laid-out menu, intuitive navigation and the Coffee Eye smart cup sensor provides maximum ease of use for all coffee lovers. The professional machine offers many benefits for operators including automatic milk system cleaning, a lockable bean container and water tank, adjustable programme functions and the ability to connect to a range of payment systems.

The W8 is ideal for offices, salesrooms and businesses where a daily capacity of up to 50 speciality coffees is required.

Easy to use and with confidence

The W8 guides the user through the selection of favourite specialities on the 3.5-inch display with buttons, while the integrated Coffee Eye helps the user to position the cup correctly. There are many different customisation options to choose from. The operator can use lock functions to easily manage access to the W8 according to the setting in which it is used. The water tank, which can be removed from the front, and the easily accessible bean container make maintenance easy and can be locked to protect the contents.

Timeless design for any environment

With its compact design, clean lines and Dark Inox colour, the W8 is space-saving, timeless and elegant. Chrome-plated elements complete the look and style. The W8 fits in perfectly with any interior design, masterfully combining aesthetics and functionality in a way guaranteed to give it universal appeal.
